Experienced technical leader and operations research/systems analyst with multidisciplinary experience across operations, risk management, cybersecurity, systems engineering, and applied artificial intelligence and machine learning.

EXPERIENCE

Research Associate (Consultant)

November 2023 – Present

Georgia Tech Financial Services Innovation Lab (Atlanta, GA/Hybrid)

Roles and Responsibilities

- Conducts applied research on machine learning and generative artificial intelligence for national security use.
- Designs and implements bespoke simulation models and analytical tools in Python and R.
- Serves as Chief of Staff for complex, multi-team research programs.
- Integrates disparate engineering and social science disciplines into cohesive teams across multiple lines of effort.
- Writes and edits complex technical documentation and written communications.
- Provides final editorial review of written deliverables.

Selected Accomplishments

- Completed a one-year DARPA Advanced Research Concepts program to answer a high-risk, high-reward fundamental research question.
- Synthesized technical, contractual, and legal inputs into a unified narrative for a third party to secure access to mission-critical data sources, preventing program failure.
- Standardized and implemented knowledge management frameworks and products.

Instructor

October 2022 – October 2024

Contract (Remote)

- Instructed cybersecurity professional certificate programs for top-100 national universities, including the University of Chicago, New York University, and University of Wisconsin—Madison.
- Mentored cohorts of 20+ students, achieving a 95% retention rate.
- Communicated advanced technical concepts, including Python programming, to non-expert audiences through structured instruction and applied exercises.

Cyber Warfare Officer

January 2016 – November 2023

United States Army (Fort Gordon, GA; Paris, France)

- Led multidisciplinary teams of 3 to 55+ personnel conducting offensive cyberspace and intelligence operations.
- Managed 10+ projects supporting national security and defense objectives, setting clear vision and end-states while maintaining detailed plans and enabling disciplined initiative.
- Planned and executed 300+ cyberspace operations, achieving national security, intelligence, and defense objectives under real-world constraints.
- Delivered real-time cyberspace effects in support of ground combat operations.
- Coordinated, integrated, and synchronized operations and intelligence across U.S. cabinet agencies, military branches and commands, and coalition nations.
- Integrated with a foreign partner's Cyber Command headquarters staff and conducted joint and multilateral operations planning.

- Developed new operational frameworks to achieve multi-national strategic objectives.
- Composed detailed technical reports for customers and stakeholders.
- Authored and maintained technical documentation for risk management policies, best practices, standard operating procedures, and tactics, techniques, and procedures.
- Established a professional development program to standardize risk management and operational best practices across the enterprise.
- Developed and maintained U.S. Cyber Command curriculum and qualification standards and instructed training programs.
- Coached, trained, and mentored junior leaders on cyberspace operations, leadership, and the profession of arms.
- Trained, evaluated, and certified personnel to perform U.S. Cyber Command and U.S. Army Cyber Command work roles and conduct cyberspace and intelligence operations.

Military Intelligence Officer

May 2014 – December 2015

United States Army (Fort Huachuca, AZ; Fort Stewart, GA)

- Led a ten-person team responsible for providing timely and accurate intelligence analysis and products to stakeholders and decision makers.
- Supervised real-time production of intelligence and analyst products to support active operations.
- Managed security operations for millions of dollars of sensitive military arms and equipment and over 650 personnel.
- Coordinated and integrated strategic assets to fill key intelligence collection gaps.
- Created technical products and standards adopted by multiple external organizations.
- Developed a database to manage collection requirements and taskings, partially automating tasking and battle tracking during high-tempo operations.

EDUCATION

Master of Science in Operations Research

August 2023 – December 2024

Georgia Institute of Technology (Atlanta, GA)

Bachelor of Science in Operations Research with Honors

June 2010 – May 2014

Minor in Terrorism Studies

United States Military Academy (West Point, NY)

CERTIFICATIONS & QUALIFICATIONS

- Industrial Engineer Intern #4769, Delaware Association of Professional Engineers
- Certified Business Continuity Professional #98470, Disaster Recovery Institute International

SKILLS

- Python and R
- Systems modeling
- Requirements analysis
- Project management
- Technical documentation
- Cat herding
